

Florida Keys Marine Stewardship

Reef and ocean education + family-safe service

THE TARGETED ASK

\$3,000

LEAN \$1,500

STRETCH \$5,000

Fund this chapter’s direct service, local transportation and reusable storytelling—practical support that remains useful after our family leaves.

WHAT THIS SUPPORT COVERS

Reef education, cleanup supplies, local transportation and reusable story assets for participating organizations.

EXPECTED LOCAL VALUE

A family-centered marine chapter that makes reef care understandable, visible and easier for visitors to carry home.

BEST-FIT FUNDING LANES

marine conservation · environmental education · Florida giving

THE LARGER MISSION

Three generations will travel from the Florida Keys to Maine for 60 days. Service is the itinerary: local organizations name what they need, our family shows up to help, and each participating organization receives photographs and short-form storytelling it can use at no cost.

WHY THIS MODEL WORKS

Funding converts directly into local supplies, family volunteer time and story assets—not organizational overhead.

CLEAR ACCOUNTABILITY

Support is tracked by chapter and reported clearly.

Help this chapter leave something useful behind.
